Disability Power 100

Euan MacDonald MBE

When Euan started using a wheelchair to move around he realised how difficult it was to do everyday things, like shopping.

He realised he had to do a lot of research before going somewhere new.

So, in 2013 he created Euan's Guide.

Euan's Guide is somewhere people can share the information they have about whether a place is **accessible** for disabled people or not.

Accessible means it is easy to use and suitable for people with different needs.

Disabled people can check Euan's guide before going somewhere new, to see if it is accessible or not.

Euan also set up the Euan Macdonald Centre - which helps scientists who are researching **Motor Neuron Disease** work with other scientists.

Motor Neurone Disease is a health condition that affects a person's brain. It causes them to get weaker over time.
